To whom it may concern,

By now you have heard all the objections raised about expanding the Naches city limits to allow for more development and housing. The concerns about traffic, safety, our already crumbling roads, and the difficulty of farming surrounded by an urban development are valid, but they miss the point. A petition was signed against this plan by nearly everyone living in the expansion zone. They don't want it. If the talk around Naches is any indication then the overwhelming majority of people living in the Naches community don't want it. Why is no one listening?

This community belongs to all the people living here, not to one person ruling Naches with an iron fist. We are weary of being bullied.
