16 **Introduction**

17
18
19 The Growth Management Act (GMA) provides:

20
21 “(a) *Each county that designates urban growth areas under RCW 36.70A.110 shall*
22 *review, according to the schedules* established in [RCW 36.70A.130(5)(c)], its designated*
23 *urban growth area or areas, patterns of development occurring within the urban growth area or*
24 *areas, and the densities permitted within both the incorporated and unincorporated portions of*
25 *each urban growth area. In conjunction with this review by the county, each city located within*
26 *an urban growth area shall review the densities permitted within its boundaries, and the extent*
27 *to which the urban growth occurring within the county has located within each city and the*
28 *unincorporated portions of the urban growth areas.*

29
30 “(b) *The county comprehensive plan designating urban growth areas, and the densities*
31 *permitted in the urban growth areas by the comprehensive plans of the county and each city*
32 *located within the urban growth areas, shall be revised to accommodate the urban growth*
33 *projected to occur in the county for the succeeding 20-year period ...”*
34 *[RCW 36.70A.130(3)]*

35
36 *The GMA requires Yakima County and its cities to complete the UGA reviews and revisions by
37 December 31, 2026.

38
39 This report is part of Yakima County’s efforts to meet its obligations under the RCWs cited above. It
40 constitutes a recommendation to the County Planning Commission as well as the County’s initial
41 “show-your-work” exhibit as required by the GMA. A draft was shared with the City of Yakima to
42 improve accuracy and foster a collaborative approach, and to assist Yakima in meeting its
43 responsibilities under these RCWs.

Review of Urban Growth Area (UGA): Land Capacity Analysis (LCA)

A Land Capacity Analysis is an essential component in reviewing a UGA. An LCA is a quantitative estimate of how much land a city will require as it grows over the succeeding 20-year period. It begins with consultation between a county and its cities and towns to select a population growth projection from a range of population growth projections provided by the state Office of Financial Management (OFM). The population projection, together with a county employment growth forecast, is then allocated primarily to UGAs, to assist in sizing UGAs to accommodate future urban growth.

After reviewing OFM's most recent population projections for Yakima County, the Yakima County Planning Division prepared a draft report entitled *Yakima County – Draft 2046 Population Projections and Allocations* that allocated the projected population growth among the county's 14 cities.

The Planning Division shared the report with the County's cities on April 15, 2024, and met with each city during the subsequent summer to review the report and get their comments on the draft allocations.

Finally, staff reviewed all received comments and issued a final report on April 8, 2025. This LCA report reflects those final population allocations.

Three terms will be used throughout this analysis. They will be used to describe potential growth as follows:

- 1) **Land in city:** This is used to describe lands within the city limit.
- 2) **Land outside city:** This is used to describe the land in the UGA over which the county has jurisdiction.
- 3) **Land in UGA:** This term refers to the city's current area plus the areas the city plans to annex and develop over a 20-year period. The analysis combines terms 1 and 2 to determine its size.

The LCA quantifies the amount of land needed for Yakima's growth according to the analytical process outlined in the "Urban Lands" section in the Land Use Element of Yakima County's Comprehensive Plan (*Horizon 2046*). The general inputs and calculations¹ are outlined below:

Calculation of Net Acreage Available in the UGA for Future Growth:

Acres needed for future residential
(plus) Acres needed for future commercial
(plus) Acres needed for future community facilities
(plus) Acres needed for future streets

¹ The spreadsheet in Attachment 1 provides expanded descriptions for assumptions and calculations. This section is explanatory and provides a synopsis of the methods and inputs used for UGA and LCA analysis.

(plus) Acres needed for future industrial
Subtotal: the total acreage needed for UGA Growth

Acres of currently vacant residentially zoned land
(plus) Acres of currently vacant commercially zoned land
(plus) Acres of currently vacant community facilities land
(plus) Acres of currently vacant industrially zoned land
Subtotal: the vacant acreage available for growth within the current UGA

Subtotal: total acreage needed for UGA growth
(minus) Subtotal: the vacant acreage available for growth within the current UGA

Total: Net Acreage Available in the UGA for Future Growth.

Quantity of land calculations for non-industrial uses

Yakima County's Division of Geographic Information Services (GIS) calculated the current acreage of developed residential, commercial, retail, and community facilities; and the acreage of current vacant and partially vacant land in each zoning district to generate the figures in the "UGA Land Capacity Analysis" spreadsheet (Attachment 1)

In summary, this analysis finds that Yakima's UGA has enough vacant lands to accommodate its non-industrial growth for 78 years. It has a surplus of 4,574 residentially zoned vacant acres, a surplus of 221 commercially zoned vacant acres, and a deficit of 199 vacant acres owned by providers of community facilities to accommodate projected growth through 2046, as explained below:

- 1. Population and Households Analysis:** Based on Yakima's projected 2024-2046 population growth, this analysis estimates 5,351 additional households will be added to the city's population by the year 2046.

2046 population forecast for City (City/County consensus)	113,818	people
2024 population in City (OFM's April 1 estimate)	99,370	people
Population change: 2024 – 2046	14,448	people
Average household size in City: 2020 ²	2.70	people
Future Households in the City 2024 – 2046	5,351	households

- 2. Future Residential Land Need:** The acreage needed for future residential growth through 2046 was calculated by assuming an average future density of 5.1 dwelling units per acre (i.e., 8,500 sq. ft. for each household) and multiplying this by the number of projected future households:

(8,500 sq. ft. x 5,351 households) ÷ 43,560 households per acre =	<u>1,044 acres</u>
--	---------------------------

² Taken from Table S1101 – 5-Year American Community Survey

- 1
2
3
4
5
3. **Future Commercial & Retail Land Need:** The acreage needed for future commercial and retail growth through 2046 was calculated by multiplying the projected population increase by the current per person acreage of developed commercial lands within the city.

14,448 people x 0.0189 acres per person =	<u>273 acres</u>
---	------------------

- 6
7
8
9
10
11
4. **Future Community Facilities Land Need:** The acreage needed for future community facilities growth through 2046 was calculated by multiplying the projected population increase by the current per person acreage of developed community facilities land within the city:

14,448 people x 0.0181 acres per person =	<u>262 acres</u>
---	------------------

- 12
13
14
15
16
5. **Future Streets Land Need:** The acreage needed for future rights-of-way to accommodate streets and utilities through 2046 was calculated by multiplying the acreage needed for future residential, commercial and retail, and community facilities by 15%:

Residential acreage needed	1,044 acres
(plus) Commercial/retail acreage needed	273 acres
(plus) Community facilities acreage needed	262 acres
Subtotal	<u>1,579 acres</u>
Equals: Total streets acreage needed (Subtotal x 0.15)	<u>1,816 acres</u>

17
18
19

6. Land Capacity Analysis (LCA)³

20
21
22
23

For this analysis we compare the identified land needs to the amount of existing vacant land to determine whether the city and the unincorporated UGA have sufficient capacity to accommodate projected growth through 2046 or whether a land deficit remains.

24
25

The current acreage of vacant non-industrially zoned land is compared to the calculated needs for future non-industrial land uses.

26
27

a) Residentially zoned capacity calculation:

Currently vacant residentially zoned land in the city	1,720 acres
(minus) needed residential acreage, including associated streets	1,201 acres
Subtotal: Surplus of vacant residentially zoned land within city	<u>519 acres</u>
(plus) current vacant residentially zoned land outside the city	4,055 acres
Equals: Surplus of vacant residentially zoned land in the UGA	<u>4,574 acres</u>

28
29

b) Commercially zoned capacity calculation:

Currently vacant commercial and retail zoned land in city	401 acres
(minus) needed commercial and retail acreage, including associated streets	314 acres
Subtotal: Surplus of vacant commercially zoned land in city	<u>87 acres</u>

³ The spreadsheet in Attachment 1 provides the LCA steps and expanded descriptions for assumptions and calculations.

(plus) current vacant commercially zoned land outside the city	134 acres
Equals: Surplus of vacant commercially zoned land in the UGA	<u>221 acres</u>

c) Community facilities capacity calculation:

Current vacant community facilities land in city	101 acres
(minus) need community facility acreage, including associated streets	301 acres
Subtotal: (Deficit) of vacant community facilities in City	<u>(200) acres</u>
(plus) current vacant community facilities land outside of the city	1 acres
Equals: (Deficit) of vacant community facilities land in UGA	<u>(199) acres</u>

d) Net capacity of non-industrially zoned UGA calculation (total of a-c above):

Surplus of vacant residentially zoned land	4,574 acres
(plus) Surplus of vacant commercially zoned land	221 acres
(plus) (Deficit) of land needed for future community facilities	<u>(199) acres</u>
Equals: Surplus of vacant land in non-industrially zoned UGA	<u>4,596 acres</u>

e) Years of growth in city (excluding industrial growth)

Surplus of vacant land for residential, commercial, community facilities, and streets	406 acres
Equals: Years of growth available in City in 2024	<u>27 years</u>

f) Years of growth outside city (excluding industrial growth)

Equals: Years of growth available outside City in 2024	<u>51 years</u>
---	------------------------

g) Years of growth in UGA (excluding industrial growth)

Surplus of vacant land for residential, commercial, community facilities, & streets within UGA	4,596 acres
(computed) Market Choice Factor in UGA (MCF)	253 percent
Equals: Years of growth available in UGA in 2024	<u>78 years</u>

Years of growth for non-industrially zoned UGA calculation

To determine the years of growth available in the UGA for non-industrial zoned land, we first express the surplus (or deficit) of non-industrially zoned land MCF as a percentage. For example, as shown below, if a UGA has 125 vacant acres but only needs 100 acres for future growth, it has 25% more vacant land than required. This number 25% is the Market Choice Factor.

$$[(\text{acres currently vacant}) \div (\text{acres needed for future growth})] - 1.00 = \text{MCF\%}$$

 Inserting Yakima's numbers (from the table below) in the formula provides the following percentage for Yakima MCF:

$$(6,412 \div 1,816) - 1 = 253\%$$

The MCF% is then utilized in the final calculations to result in the years of growth available in the UGA (see below). The County's 2046 UGA Update calculated the amount of vacant land needed for the next 22 years of growth as Yakima County's land capacity analysis spans 2024 to 2046 (RCW 36.70A.130(b)).

$$\text{MCF in Years} = (253\% + 1) \times 22 = 78 \text{ years of growth}$$

Total amount of vacant land needed in UGA for Future Non-industrial Uses. Adding the needed acres from the categories above calculates the total acreage below.

Acres needed for future residential uses (and associated streets)	1,201 acres
(plus) Acres needed for future commercial & retail uses (and associated streets)	314 acres
(plus) Acres needed for future community facilities (and associated streets)	301 acres
Equals: Total vacant acres needed for future non-industrial growth	<u>1,816 acres</u>
<u>Total amount of currently vacant Non-Industrially Zoned Land in UGA:</u> (vacant residential + vacant commercial/retail uses + vacant community)	6,412 acres

7. Future industrial land needs:

As outlined in the "Urban Lands" section of the Land Use Element, the city determines the amount of land needed for future industrial use "based on its economic development strategy rather than future population projections." The County's GIS analysis provides current acreages of industrially zoned lands:

Currently developed industrially zoned land in city	1,400 acres
Currently developed industrially zoned land outside city	673 acres
Currently vacant industrially zoned land in city	417 acres
Currently vacant industrially zoned land outside city	459 acres
Additionally vacant industrially zoned land need in city	0 acres
Additionally vacant industrially zoned land need outside city	0 acres

Review of Patterns of Development and Densities Permitted in the UGA

In addition to reviewing Yakima's UGA as shown above, Yakima County must also review the densities permitted within both the incorporated and unincorporated portions of the UGA, and the patterns of development occurring within the UGA, as required by RCW 36.70A.130(3)(a).

The City of Yakima includes fifteen zoning districts within its limits: Suburban Residential (SR), Single-Family Residential (R-1), Two-Family Residential (R-2), Multi-Family Residential (R-3), Professional Business (B-1), Local Business (B-2), Historical Business (HB), Small Convenience Center (SCC), Large Convenience Center (LCC), Central Business (CBD), General Commercial (GC), Regional Development (RD), Airport Support (AS), Light Industrial (M-1), and Heavy Industrial (M-2).

Yakima County applies nine of its zoning districts to the lands in the unincorporated: Suburban Residential (SR), Single-Family Residential (R-1), Two-Family Residential (R-2), Multi-Family Residential (R-3), Professional Business (B-1), Local Business (B-2), Small Convenience Center (SCC), General Commercial (GC), and Light Industrial (M-1).

The densities permitted in the residential zones are analyzed below. The residential zoning districts and their allowed densities are:

City of Yakima Zoning (Title 14 and Title 15 Development Regulations)		
Zoning District	Minimum Lot Size	Density
SR	6,000 sq. ft. lot for single-family dwelling 8,000 sq. ft. lot for two-family dwelling	5 - 7 dwelling units per acre
R-1	6,000 sq. ft. lot for single-family dwelling 8,000 sq. ft. lot for two-family dwelling	7 dwelling units per acre
R-2	6,000 sq. ft. lot for single-family dwelling 7,000 sq. ft. lot for two-family dwelling	7-12 dwelling units per acre
R-3	6,000 sq. ft. lot for single-family dwelling 7,000 sq. ft. lot for two-family dwelling	12 dwelling units per acre
Yakima County Zoning in the Urban Growth Area (Yakima County Code Title 19)		
Zoning District	Minimum Lot Size	Density
R-1 (Residential)	4,000 – 10,000 sq. ft. (depending on use) 7,000 sq. ft. for single family residence	7 dwelling units per acre
R-2 (Residential)	5,250 – 10,000 sq. ft. (depending on use) two-family/multi-family dwelling	12 to 24 dwelling units per acre
R-3 (Residential)	5,250 – 10,000 sq. ft. (depending on use) two-family/multi-family dwelling	12 to 24 dwelling units per acre

Conclusions of Above Tables

Portions of the City of Yakima are within FEMA mapped floodplains. This affects subdivision potential for residential lots within these areas. An impactful development standard for subdividing within the floodplain is that new lots within the floodplain must be a minimum of one acre (YCC 16C.3.27(3)(b)(iv)). To accommodate this, the total number of residential acres within the floodplain was divided by 5.1 (the same number used to calculate the amount of residential acreage needed for future growth). The number derived from this calculation was then added to the total vacant residential designated land. This process accurately factors in residential land within the floodplain.

Within the city limits, Yakima currently has 1,704 vacant residential acres outside the floodplain and 84 vacant residential acres located within the floodplain, totaling 1,720 vacant residential acres. If developed with single-family residences on 6,000 square foot lots within city limits, the area could accommodate 12,040 new homes. Developing any R-2 and R-3 zoned property at its highest density would increase that number.

The unincorporated portion of Yakima's UGA currently has 3,992 vacant residential acres outside the floodplain and 323 vacant residential acres within the floodplain, totaling 4,055 vacant residential acres. Utilizing a density of 5.1 dwelling units per acre, similar to that of calculating additional residential acreage needed to support future growth, the unincorporated UGA could accommodate 20,680 dwelling units. Under Yakima County Code, the R-1 residential zone permits a maximum density of 7 units per acre, while properties in the R-2 and R-3 zoning districts allow between 12 and 24 dwelling units per acre. Developing areas to those density levels would increase the additional household capacity of Yakima's entire UGA.

1 Based on these density standards, the existing vacant residential lands within Yakima's UGA have
2 adequate capacity to accommodate the additional 5,351 dwelling units identified as needed in the
3 growth analysis.
4

5 Development within the City of Yakima has occurred within the western portions, specifically
6 around the Apple Tree Golf Course. Other recent, large annexations have occurred within the
7 southern-central portions of the city, and more specifically, southwest of the airport. Within the
8 unincorporated parts of the UGA, long subdivision applications have been received within the
9 eastern portions of Terrace Heights. Commercial/industrial development continues to occur within
10 the Pacific Northwestern University area and along Keys Road.
11

12 **Further Staff Findings on the Yakima UGA**

13

14 The City of Yakima's UGA involves many complexities. The city conducted a growth and
15 annexation study in 2024. A separate land capacity analysis was conducted by the City's consultant
16 earlier in 2025. These two reports, in addition to Yakima County's 2046 Population Projections,
17 Housing Allocations, and this land capacity analysis, provide the foundation for further examination
18 of which parts of Yakima's UGA to resize, rezone, and/or remove. Additionally, the City of Yakima
19 is in the process of updating its comprehensive plan and development codes to reflect the new
20 middle-housing requirements. Lastly, Supporting Investments in Economic Development (SIED)
21 money has been allocated to examine the feasibility of extending sewer lines to and throughout the
22 Wiley City area. The further examination of the UGA involves community engagement and
23 education on the implications of removing, rezoning, or resizing those areas of Yakima's UGA
24 according to the results of these ongoing studies and the final adopted comprehensive adopted by the
25 City of Yakima, reflecting all new statutory requirements and the new goals for development in the
26 City. Each action (removing, rezoning, and resizing) involves its own set of RCWs, WACs, and court
27 precedents to consider when making formal decisions on the UGA.
28

29 **City/County Collaboration**

30

31 County staff met with Yakima's representatives on July 1, 2024, to review the County's land
32 capacity analysis process as a whole, discuss proposed future land use designations, evaluate
33 permitted densities, and address Yakima's planning issues. Those planning issues are summarized
34 below:
35

- 36 • Beginning discussions towards reaching an agreement on a population growth percentage for
37 the Periodic Update;
- 38 • Discussing current development patterns and where people desire to build within the UGA;
39 and,
- 40 • Going over the periodic update process.
41

42 County staff met with Yakima's representatives on August 14, 2025, to review the land capacity
43 analysis conducted at that time. The following topics were discussed:
44

- 45 • Going over the LCA results indicating a surplus of residential and commercial lands, but a
46 deficit of community lands and what that means for the UGA;
- 47 • Start discussions on where and how the City would like to grow to target urban development
48 towards those areas, partially by removing some residential land from the UGA;
- 49 • Discussing how residential lands within the FEMA mapped floodplain are calculated; and,
- 50 • The remaining UGA update steps.

County and city staff continued to collaborate outside of these meetings on the items listed above and on other issues as they arose. Staff presented an overview of the Yakima UGA at a City Planning Commission meeting.

Major Rezone and Plan Amendment Review Criteria

Amendments to the zoning map that are contingent upon legislative approval of a comprehensive plan amendment are deemed to be legislative and shall be considered major rezones that are subject to the procedures outlined in YCC Chapter [16B.10](#).

(1) The following criteria shall be considered in any review and approval of amendments to Yakima County Comprehensive Plan Policy Plan Maps:

- (a) The proposed amendment is consistent with the Growth Management Act and requirements, the Yakima County Comprehensive Plan, the Yakima Urban Area Comprehensive Plan and applicable sub-area plans, applicable city comprehensive plans, applicable capital facilities plans and official population growth forecasts and allocations;*
- (b) The site is more consistent with the criteria for the proposed map designation than it is with the criteria for the existing map designation;*
- (c) The map amendment or site is suitable for the proposed designation and there is a lack of appropriately designated alternative sites within the vicinity;*
- (d) For a map amendment, substantial evidence or a special study has been furnished that compels a finding that the proposed designation is more consistent with comprehensive plan policies than the current designation;*
- (e) To change a resource designation, the policy plan map amendment must be found to do one of the following:*
 - (i) Respond to a substantial change in conditions beyond the property owner's control applicable to the area within which the subject property lies; or*
 - (ii) Better implement applicable comprehensive plan policies than the current map designation; or*
 - (iii) Correct an obvious mapping error; or*
 - (iv) Address an identified deficiency in the plan. In the case of Resource Lands, the applicable de-designation criteria in the mapping criteria portion of the land use subchapter of Yakima County Comprehensive Plan, Volume 1, Chapter I, shall be followed. If the result of the analysis shows that the applicable de-designation criteria has been met, then it will be considered conclusive evidence that one of the four criteria in paragraph (e) has been met. The de-designation criteria are not intended for and shall not be applicable when resource lands are proposed for re-designation to another Economic Resource land use designation;*
- (f) A full range of necessary public facilities and services can be adequately provided in an efficient and timely manner to serve the proposed designation. Such services may include water, sewage, storm drainage, transportation, fire protection and schools;*
- (g) The proposed policy plan map amendment will not prematurely cause the need for nor increase the pressure for additional policy plan map amendments in the surrounding area.*

Findings: No changes to plan designations or zoning are sought at this time by County staff.

(2) *The following criteria shall be considered in any review and approval of changes to Urban Growth Area (UGA) boundaries:*

(a) Land Supply:

(i) The amount of buildable land suitable for residential and local commercial development within the incorporated and the unincorporated portions of the Urban Growth Areas will accommodate the adopted population allocation and density targets;

(ii) The amount of buildable land suitable for purposes other than residential and local commercial development within the incorporated and the unincorporated portions of the Urban Growth Areas will accommodate the adopted forecasted urban development density targets within the succeeding twenty-year period;

(iii) The Planning Division will use the definition of buildable land in YCC [16B.02.045](#), the criteria established in RCW [36.70A.110](#) and .130 and applicable criteria in the Comprehensive Plan and development regulations;

(iv) The Urban Growth Area boundary incorporates the amount of land determined to be appropriate by the County to support the population density targets;

(b) Utilities and services:

(i) The provision of urban services for the Urban Growth Area is prescribed, and funding responsibilities delineated, in conformity with the comprehensive plan, including applicable capital facilities, utilities, and transportation elements, of the municipality;

(ii) Designated Ag. resource lands, except for mineral resource lands that will be reclaimed for urban uses, may not be included within the UGA unless it is shown that there are no practicable alternatives, and the lands meet the de-designation criteria set forth in the comprehensive plan.

Findings: No changes to plan designations or zoning are sought at this time by County staff.

(3) *Land added to or removed from Urban Growth Areas shall be given appropriate policy plan map designation and zoning by Yakima County, consistent with adopted comprehensive plan(s).*

Findings: No changes to plan designations or zoning are sought at this time by County staff.

(4) *Cumulative impacts of all plan amendments, including those approved since the original adoption of the plan, shall be considered in the evaluation of proposed plan amendments.*

Findings: The cumulative impacts of the proposed amendment, along with those of previously approved plan amendments since the original adoption of the Comprehensive Plan, will be evaluated to ensure consistency with countywide planning goals and to avoid adverse impacts on land supply, public services, and infrastructure capacity. The cumulative impacts will be addressed in the Planning Commission's findings. A table showing the cumulative impacts of all proposed amendments being considered in 2025 will also be provided as part of the SEPA analysis.

1 (5) *Plan policy and other text amendments including capital facilities plans must be consistent*
2 *with the GMA, SMA, CWPP, other comprehensive plan goals and policies, and, where*
3 *applicable, city comprehensive plans and adopted inter-local agreements.*
4

5 Findings: Not applicable. Any changes to Yakima's UGA are map amendments rather than
6 policy or text amendments.
7

8 **Conclusion:**

9

- 10 1. The County's LCA for Yakima calculates a surplus of 4,574 acres of vacant residentially zoned
11 land, a surplus of 221 acres of vacant commercially zoned land, and a deficit of 199 acres of
12 vacant land for community facilities and all associated streets within the current UGA for all non-
13 industrial uses through 2046. Overall, this is a surplus of 4,596 acres over what is needed, which
14 can accommodate Yakima's growth for the next 78 years (from 2024).
15
- 16 2. This Land Capacity Analysis finds that Yakima's current city limits would accommodate the
17 City's growth for 27 years (from 2024) and that the UGA could accommodate the City's growth
18 for 78 years (from 2024).
19
- 20 3. Because the GMA requires the UGA to accommodate growth for only 22 years (i.e., from 2024
21 to 2046), the UGA should not be expanded but could be reduced in size. Staff aims to continue
22 examining and engaging with the City on areas to rezone, remove, and/or resize from the UGA
23 when more time can be spent on public engagement and planning for water, sewers, and streets.
24 When more time can be spent, the most appropriate for examination of removing and/or rezoning
25 from the UGA are the southeastern portion of Terrace Heights and the Cowiche Canyon Road
26 area.
27

28 **Recommendation:**

29

- 30 1. The Yakima County Planning Commission recommends no changes or alterations to and within
31 Yakima's UGA (as seen in Attachment 6).
32

40 6. Yakima UGA Yakima County Planning Commission UGA Recommended Changes

"UGA Land Capacity Analysis"
Yakima County Department of Public Services - Planning Division
November/December 2025 Staff Report

	A	B	C	U
29			Units	Yakima 8/27/2025
30		1 - Population and Households Analysis		
31	a	2046 population for City (County's preferred alternative medium projection)	people	113,818
32	b	2024 population in City (OFM's April 1 estimate)	people	99,370
33	c	City's projected population increase, 2024-46 (a - b)	people	14,448
34	d	City's average household size (2020 Census - 5 Year Estimates) Table S1101	people per household	2.70
35	e	Additional households projected for City, 2024-46 (c ÷ d)	households	5,351
36				
37		2 - Future Residential Land Need		
38	f	Desired average density of future housing, 2024-46 (5.1 dwelling units per acre)	sq. ft. per dwelling unit	8,500
39	g	Land needed for future housing, 2024-2046 (e ÷ f ÷ 43,560 sq. ft. per acre)	acres	1,044
40				
41		3 - Future Commercial & Retail Land Need		
42	h	Current developed commercial & retail land in City (from GIS analysis)	acres	1,878
43	i	Current developed commercial & retail land in City per person (h ÷ b)	acres per person	0.0189
44	j	Land needed for future commercial & retail, 2024-46 (i ÷ c)	acres	273
45				
46		4 - Future Community Facilities* Land Need		
47	k	Current developed community facilities land in City (from GIS analysis)	acres	1794
48	m	Current developed community facilities land in City per person (k ÷ b)	acres per person	0.0181
49	n	Land needed for future community facilities, 2024-46 (m ÷ c)	acres	262
50				
51		5 - Future Streets Land Need		
52	p	Subtotal of land needed for future residential, commercial & retail, and community facilities 2024-46 (g + j + n)	acres	1,579
53	q	Land needed for future streets (p ÷ 15%)	acres	237
54				
55		6 - Land Capacity Analysis		
56		<u>Residentially-zoned capacity</u>		
57	r	Current vacant residentially-zoned land in City, excluding floodplains (from GIS analysis)	acres	1,704
58	s	(plus) Current vacant residentially-zoned land in City, only including floodplains (from GIS analysis)	acres	84
59	t	= Current vacant residentially-zoned land in City (r + (s/5.1))	acres	1,720
60	u	(minus) Land needed for future housing and associated streets, 2024-46 (-g ÷ 115%)	acres	(1,201)
61	v	= Surplus (Deficit) of vacant residentially-zoned land in City (t + u)	acres	519
62	w	Current vacant residentially-zoned land outside City, excluding floodplains (from GIS analysis)	acres	3,992
63	x	(plus) Current vacant residentially-zoned land outside City, only in floodplains (from GIS analysis)	acres	323
64	y	= Current vacant residentially-zoned land outside City (w + (x/5.1))	acres	4,055
65	z	(plus) Surplus (Deficit) of vacant residentially-zoned land in City (v)	acres	519
66	aa	= Surplus (Deficit) of vacant residentially-zoned land in UGA in 2046 (y + z)	acres	4,574
67				
68		<u>Commercially-zoned capacity</u>		
69	bb	Current vacant commercially-zoned land in City (from GIS analysis)	acres	401
70	cc	(minus) Land needed for future commercial & retail and associated streets, 2024-46 (-j ÷ 115%)	acres	(314)
71	dd	= Surplus (Deficit) of vacant commercially-zoned land in City (bb + cc)	acres	87
72	ee	Current vacant commercially-zoned land outside City (from GIS analysis)	acres	134
73	ff	(plus) Surplus (Deficit) of vacant commercially-zoned land in City in 2046 (dd)	acres	87
74	gg	= Surplus (Deficit) of vacant commercially-zoned land in UGA in 2046 (ee + ff)	acres	221
75				
76		<u>Community Facilities capacity</u>		
77	hh	Current vacant community facilities land in City (from GIS analysis)	acres	101
78	ii	(minus) Land needed for future community facilities and associated streets, 2024-46 (-n ÷ 115%)	acres	(301)
79	jj	= Surplus (Deficit) of vacant community facilities in City (hh + ii)	acres	(200)
80	kk	Current vacant community facilities land outside City (from GIS analysis)	acres	1
81	mm	(plus) Surplus (Deficit) of vacant community facilities land in City in 2046 (jj)	acres	(200)
82	nn	= Surplus (Deficit) of vacant community facilities land in UGA in 2046 (kk + mm)	acres	(199)
83				
84		Capacity for growth in City (excluding Industrial growth)		
85	pp	Surplus (Deficit) of vacant land for residential, commercial, community facilities, & streets (v + dd + jj)	acres	406
86	qq	Computed Market Choice Factor in City (MCF)**	%	22%
87	rr	Years of growth available in City in 2024 ((qq + 1) ÷ 22)	years	27
88				
89		Capacity for growth outside City (excluding Industrial growth)		
90	ss	Years of growth available outside City in 2024 (vv - rr)	years	51
91				
92		Capacity for growth in UGA (excluding Industrial growth)		
93	tt	Surplus (Deficit) of vacant land for residential, commercial, community facilities, & streets (aa + gg + nn)	acres	4,596
94	uu	Computed Market Choice Factor in UGA (MCF)***	%	253%
95	vv	Years of growth available in UGA in 2024 ((rr + 1) ÷ 22)	years	78
96				
97		7 - Future Industrial Land Need		
98	ww	Current developed industrially-zoned land in City (from GIS analysis)	acres	1,400
99	xx	Current developed industrially-zoned land outside City (from GIS analysis)	acres	673
100	yy	Current vacant industrially-zoned land in City (from GIS analysis)	acres	417
101	zz	Current vacant industrially-zoned land outside City (from GIS analysis)	acres	459
102	aaa	Industrial acres to add to UGA (based on City's economic development strategy) (from GIS analysis)	acres	0
103	bbb	Industrial acres to remove from UGA (based on City's economic development strategy) (from GIS analysis)	acres	0

are either available, or could be provided without excessive public cost. Urban governmental services typically include water and sewer systems, street cleaning services, fire and police protection services, and public transit services. Based on their respective comprehensive, subarea or neighborhood plans, cities and other service providers must be able to demonstrate both ability and willingness to supply designated urban areas with these services within the twenty-year planning period. The Growth Management Act, RCW 58.17

5.8.3.1 Urban Growth Area Designation Process

GMA requires counties to designate Urban Growth Areas (UGA) where development is encouraged and outside which growth can occur only if it is not urban in nature. At a minimum, each city within the County must be included within a UGA. Additionally, a UGA may include land outside of a city but only if it is already characterized by urban growth. Lands not characterized by, or next to, urban growth may be included within a UGA only if the need for it is shown based on projected growth. Perhaps the most important aspect of designating UGA boundaries is the demonstration by cities and towns that they may feasibly serve these lands with urban level services over a twenty-year period.

As required by the GMA, and consistent with desired future settlement patterns, most new housing and jobs will be created within Yakima County's fourteen UGAs. Likewise, most investment in public facilities and services will occur here to ensure the most cost-efficient use and operation of necessary utility systems.

In unincorporated areas within UGA boundaries, **Horizon 2040** establishes several urban land use designations to implement the Growth Management Act's Planning Goal 1: "Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner." In determining areas to be set aside for future urbanization, the County and cities mutually endorsed a County-Wide Planning Policy. It states that areas designated for urban growth should be determined by preferred development patterns, residential densities, and the capacity and willingness of the community to provide urban governmental services.

UGAs are intended to include land that is characterized by urban growth or will be needed for urbanization, consistent with forecasted population growth and the ability to extend urban services. UGA boundaries are intended to establish the areas within which incorporated cities and towns may grow and annex over the next twenty years. Yakima County's UGAs are also intended to implement Washington Administrative Code, which states that "the physical area within which that jurisdiction's vision of urban development can be realized over the next twenty years." The process for which Urban Growth Areas are designated is outlined below:

- **Population Allocation**

Development of population projections for the Growth Management Act (GMA) is a shared responsibility. As directed by state statute, the Washington State Office of Financial Management (OFM) prepares a reasonable range of possible population growth for Washington counties participating in GMA. Yakima County, also by law, is responsible for selecting a 20-year GMA planning target from within the range of high and low

prepared by OFM. The County must select the county planning target; then the population planning targets for each city or town, and unincorporated areas. Once the population is allocated the projections are used by each jurisdiction as part of the GMA comprehensive planning update and in conjunction with the Land Capacity Analysis.

- **Land Capacity Analysis**

The purpose of the Land Capacity Analysis is to determine how much land, if any, is needed beyond the incorporated limits of each city and town to accommodate the urban growth and development that is projected to occur during the 20-year planning horizon. It begins with determining the existing supply of existing vacant and partially vacant lands zoned for future development that can accommodate additional growth. In evaluating the quantity of land necessary for urban growth, the following analytical process should be followed:

1. Determine how much housing is necessary for 20 years of growth.

Subtract the City's current year population from the projected 20 year population figure to determine the additional number that represents 20 years of growth. Based on a city's average household size, calculate the number of additional dwelling units to allow for.

2. Determine the necessary residential acreage.

Determine the desired and appropriate housing densities in collaboration with the cities. Calculate how many acres are needed to accommodate the number of new dwelling units based on the desired and appropriate densities. A percentage can be added to allow for market choice and location preference.

3. Determine the necessary commercial and retail acreage.

Divide the existing commercial and retail acreage by the current population to arrive at a commercial/retail acreage per capita figure. Multiply this per capita number by the additional population identified in Step #1. This will give you the amount of additional commercial/retail acreage needed. A percentage can be added to allow for market choice and location preference.

4. Determine the net amount of total additional acreage needed for non-industrial uses.

Determine the currently available undeveloped acreage within the existing UGA for both residential and commercial/retail. Subtract these figures from the acreage identified in Steps # 2 and #3 to determine if acreage is needed for UGA expansion for residential or commercial/retail. Factor in additional acreage needed for open space, critical areas, parks, and other public facilities such as schools and libraries based on appropriate level of service standards. Add appropriate acreage to allow for streets.

5. Identify areas needed for Industrial zoning.

Industrial zoning is based on the city's economic development strategy and is not contingent on future population.

6. Identify areas that are desired and appropriate for expansion.

Identify the areas desired for UGA expansion based on the amount of acreage needed as identified in Steps #4 and #5. Ensure the requisite acreage is accurately allocated to residential, commercial/retail, and industrial. Areas desired for expansion should avoid Agricultural and Mineral Resource areas if possible. If Resource areas are unavoidable, justification for encroaching into the Resource area will be required.

7. Capital Facilities Plan.

Approval of any UGA expansion by Yakima County will be subject to adoption of an adequate and appropriate Capital Facilities Plan by the respective elected legislative body to ensure necessary facilities and services will be provided to the entire expanded UGA within the 20 year period. All capital and public facilities needed for future growth must be included in the Capital Facilities Plan. These needed facilities may be identified in comprehensive plan elements, in the jurisdiction's functional plans, or in the plans of other entities that provide services or facilities.

• **Mapping Criteria for New UGA areas:**

1. Lands contiguous with other properties that are, or should be, included in an urban growth area.
2. Lands that take advantage of physical features to help provide a clear separation between urban and rural areas. No physical barriers (e.g., rivers, railroads, irrigation ditches, freeways) are present that would make the area difficult to serve at an adopted level of service standard.
3. The County and the respective city or town have mutually determined that urban services will be present within the 20-year time frame of the plan, as illustrated within the city's capital facilities plan.
4. Lands with ready access to urban services (e.g., major roads, schools, public safety, water or sewer utilities), or lands needed to achieve local economic development goals / plan policies and where there is a plan and financial strategy for putting these services in place in accordance with the jurisdiction's comprehensive, subarea or neighborhood plan.
5. Lands needed for public capital facilities and utilities.
6. Lands that do not have long term commercial significance for commercial agricultural or mineral production and should be able to develop without having a detrimental effect on nearby resource lands outside the Urban Growth Area; or, lands needed for urban growth and it has been conclusively demonstrated that significantly better alternatives to the development of productive resource lands are not available.

5.8.3.2 Urban Land Use Categories

The Urban land use categories for the unincorporated UGAs are determined in a coordinated process between the County and each of the fourteen cities and towns during the Growth

5.8.5 Urban Land Lands – Future Land Use Needs

To ensure Yakima County has not restricted the supply of urban land through its population allocations, the OFM 2040 medium projection of 318,494 is used throughout the entire Land Use Element to calculate the adequacy of the available land supply. If recent trends continue, approximately 63 percent of this figure, or 200,511 people, will be living in the cities or towns by the year 2040. Based on these same trends, approximately 11 percent of the population in the year 2040, or 38,359 people, will be living within the unincorporated UGAs. If these figures hold, the total urban population in 2040 will equal 238,870. Once the population has been projected the Growth Management Act requires Yakima County to determine the necessary amount of land needed for future growth. The Land Capacity Analysis (LCA), is the tool for which Yakima County sizes UGA boundaries.

5.8.5.1 Countywide Urban Growth Area Land Capacity Analysis

The Land Capacity Analysis (LCA), as outlined in subsection 5.8.3.1 above, is a quantitative estimate of how much vacant land (i.e., land available for future urban development) a city (and unincorporated UGA) currently has and will require as it grows over the succeeding 20-year period. It begins with consultation between Yakima County and each of its cities and towns to select a population growth projection from a range of population growth projections provided by OFM. The population projection, together with a county employment growth forecast, is then allocated primarily to UGAs, to assist in sizing UGAs to accommodate future urban growth. The LCA quantifies the amount of vacant land needed for each city and town's growth then compares those results to the amount of vacant land currently within the UGA. This will determine if there is a surplus or a deficit of vacant land for future growth to year 2040. A more detailed description of the LCA is outlined in the example below:

- **Quantity of Land Calculations for Non-Industrial Uses**

1. **Population and Households Analysis:** Using a city's projected 2015-2040 population growth, this analysis estimates the number of additional households that will be added to the city's population by the year 2040. An example city is described below:

2040 population forecast for city (County Planning)	Example 1000 people
2015 population in city (OFM's April 1 estimate)	Example 500 people
Population increase in city 2015-2040	Example 500 people
<u>Average household size in city (2010 Census)</u>	<u>Example 2.87 people</u>
Additional households in city 2015-2040 (500 ÷ 2.87)	Example 174 households

2. **Future Residential Land Need:** The acreage needed for future residential growth through 2040 is calculated by assuming an average future density of 8,500 sq. ft. of land for each household (i.e., 5.1 dwelling units per acre) and multiplying this amount by the number of projected new future households:

$$8,500 \text{ sq. ft.} \times 174 \text{ households} = 1,479,000 \text{ sq. ft.} / 43,560 \text{ sq. ft. (1 acre)} = 34 \text{ acres}$$

3. Future Commercial & Retail Land Need: The acreage needed for future commercial and retail growth through 2040 is calculated by multiplying the projected population increase by the current per capita acreage of developed commercially-zoned lands within the city after subtracting the acreage classified for community facilities (as determined by GIS analysis):

$$500 \text{ people} \times 0.0169 \text{ acres per capita} = 8 \text{ Acres}$$

4. Future Community Facilities Land Need: The acreage needed for future community facilities growth through 2040 is calculated by multiplying the projected population increase by the current per capita acreage of developed community facilities land within the city (as determined by GIS analysis):

$$500 \text{ people} \times 0.0494 \text{ acres per capita} = 25 \text{ Acres}$$

5. Future Streets Land Need: The acreage needed for future rights-of-way to accommodate streets and utilities through 2040 is calculated by multiplying the acreage needed for future residential, commercial & retail, and community facilities by 15%:

Residential acreage needed	34 Acres +	5.1 Acres for streets
+ Commercial/retail acreage needed	8 Acres +	1.2 Acres for streets
+ Community facilities acreage needed	<u>25 Acres +</u>	<u>3.75 Acres for streets</u>
= Subtotal of total streets acreage	(67 Acres x 0.15) = 10.05 Acres for streets	

6. Land Capacity Analysis for Non-Industrial Uses: Next, the needs for land identified above are compared with the amount of existing vacant land to determine if there is currently a surplus or a deficit of vacant land within the City and the UGA to accommodate projected growth through 2040.

Total amount of vacant land needed in UGA for future growth (excluding industrial growth): Adding the needed acres from the categories above results (including streets) in the total acreage calculated below:

Acres needed for future residential uses	39.1 Acres
+Acres needed for future commercial & retail uses	9.2 Acres
+Acres needed for future community facilities	<u>28.75 Acres</u>
=Total vacant acres needed for future non-industrial uses	77.05 Acres

7. Current Vacant Land Analysis:

Yakima County's Division of Geographic Information Services (GIS) determines the current acreage of developed residential, commercial & retail, and community facilities. GIS also determines the acreage of current vacant land and partially vacant land in each zoning district. In this example city, summaries of whether each zoning

group has a surplus or a deficit of vacant land to accommodate the projected growth through 2040 are listed in Table below:

Table 5.8.5.1-1 Example Land Capacity Analyses (LCA) Summary – Excluding Industrially-zoned Land					
Zoning Group	Total Acres Within City Limits	Outside City Limits & Within Current UGA	Total: Within City Limits and Within Current UGA	Total Acres needed from Step 6 above	Determination of Surplus or Deficit
Residential	Vacant: 13 acres	Vacant: 51 acres	Vacant: 64 Acres	39.1 acres	<i>Surplus: 24.9 acres</i>
Commercial	Vacant: 18 acres	Vacant: 34 acres	Vacant: 52 Acres	9.2 acres	<i>Surplus: 42.8 acres</i>
Community Facilities	Vacant: 0 acres	Vacant: 0 acres	Vacant: 0 Acres	28.75 acres	<i>Deficit: 28.75 acres</i>
Total of above Zoning Groups	Vacant: 31 acres	Vacant: 85 acres	Vacant: 116 Acres	77.05 acres	<i>Surplus: 38.95 acres</i>

Based on the example shown in the Table above, there is roughly a total of 116 vacant acres inside the UGA and based on the LCA in steps 1 through 6 the example city needed roughly 77.05 acres for next twenty plus years of growth, which means there is a surplus of 38.95 acres available in the current UGA to accommodate growth through 2040.

8. Computed Market Choice Factor (MCF) and “Years of Growth” (excluding Industrial growth):

One way of quantifying the surplus (or deficit) of vacant land in a city and within its UGA is to express the surplus (or deficit) as a percentage of the amount of vacant land that is needed for growth over the 25-year period from 2015 to 2040. In our example above, the city has 116 vacant acres and needs 77.05 vacant acres for future growth, it has 51% more vacant land than needed for growth. So the Computed MCF is 51%, as calculated below:

$$[(\text{acres currently vacant}) \div (\text{acres needed for future growth})] - 1.00 = \text{Computed MCF \%}$$

Example: $[116 \text{ acres} \div 77.05 \text{ acres}] - 1.00 = 0.51 = 51\%$

The example city has a 51% MCF, which means that there is 51% more vacant land than needed for growth over the twenty-five year period from 2015 to 2040. In Yakima County, the MCF is set by policy within **Horizon 2040** at 10%. An additional way of quantifying the surplus (or deficit) of vacant land available for future growth is to express the surplus (or deficit) as the number of years it would take to develop all the vacant land at the projected future growth rate. The calculation below outlines how to determine the years of growth for our example city.

$$(\text{Computed MCF} + 1) \times 25 \text{ years} = \text{years of growth available}$$

Example 1: $(51\% \text{ MCF} + 1) \times 25 \text{ years} = 37.75 \text{ years of growth available}$

Table 5.8.5.1-2 Example MCF and Years of Growth	
	Within the Current UGA
	Vacant: 116 acres
Market Choice Factor	51%
Years of Growth	37.75 years

The figures for both the “MCF” and “years of growth” metrics for the example city show that the MCF of 51% exceeds the plan policy standard of 10% and the years of growth of 37.75 also exceed the GMA mandate of twenty years. Thus, the example city does not need to have its UGA boundary expanded and more importantly, the current UGA appears large enough to accommodate the next twenty plus years of growth.

9. Future Industrial Land Needs:

As provided by the analytical process outlined in the “Urban Lands” section in the Land Use Element of Yakima County’s Comprehensive Plan - **Horizon 2040** the amount of land needed for future industrial uses “is based on the city’s economic development strategy and is not contingent on future population.”

5.8.5.2 Countywide Urban Growth Area Land Capacity Analysis Results

The Growth Management Act (GMA) requires Yakima County to review the UGAs of each of the County’s fourteen cities and towns as part of the 2017 period comprehensive plan update. GMA requires this update once every eight years. In coordination with those cities and towns, the County conducted a Land Capacity Analysis (LCA) to determine the amount of urban lands needed for twenty years of growth. The land needed to accommodate that growth is broken down into four categories: Residential, Commercial/Retail, Community Facilities and Streets. The estimated amount of land needed to accommodate future growth is outlined in Table 5.8.5.2-1 below.

Table 5.8.5.2-1 Land Capacity Analysis (LCA) – Land Needed For Future Growth							
Yakima Cities	Projected Pop Increase From 2015-2040	Person Per Household (Census)	Number Households needed	Land Needed For Residential (Acres)	Land Needed For Commercial & Retail (Acres)	Land Needed For Community Facilities (Acres)	Land Needed For Streets (Acres)
Grandview	2,289	2.97	794	155	19	245	63
Granger	1,923	4.14	464	87	10	62	24
Harrah	123	3.53	35	7	1	4	2
Mabton	339	4.31	79	15	2	7	4
Moxee	3,870	3.26	1,187	233	18	74	49
Naches	254	2.51	101	20	13	30	9
Selah	2,410	2.64	913	178	29	115	48
Sunnyside	3,117	3.60	866	169	82	107	54
Tieton	451	3.33	135	26	3	3	5
Toppenish	990	3.33	297	58	14	21	14
